

Mr. Regis Luther
Vice President
Military Products and Initiatives
Navistar Defense

Regis Luther is Vice President, Military Products and Initiatives for Navistar Defense. In this role, he is responsible for implementing key defense upgrades into the company's military line of vehicles and working to further leverage Navistar's commercial product lines for military environments.

Luther joined the company in September 2009 from BAE Systems where he held various executive positions including Vice President of Engineering for the newly acquired Mobility & Protection Systems (previously Armor Holdings).

Luther graduated from Youngstown State University in Ohio where he received his bachelor's degree in Chemical Engineering. He received a Master of Engineering in Chemical Engineering at the Johns Hopkins University, and an Executive MBA with honors at the University of Houston. He has completed the Project Management Program conducted through the University of Houston, is a Certified CM Configuration Manager and an Automotive Service Excellence (ASE) recertified Truck Technician.
